# HISTORY OF SILKY INU

Silky is a caring companion, obedient, balanced, is good in contact, an adaptable dog. SILKY is a collection of 5555 NFTs that has a rich, diverse and unique pool of rearitonal foundations. Each SILKY interacts with the SILKY game, where each user plays and is rewarded in SLK SILKY tokens - the DFI MEME NFT GAME Game Revolution, an NFT revolution designed to enable free trading and make it as safe as possible.

SILKY is the epitome of community financial freedom.

# SILKY INU IS A NEW FREE NFT GAME

Where you can play completely free without additional fees.

The game is available in web and also for Android and iPhone. In game you will need to pass various difficult levels to collect more tokens by SILKY character and become the best among other players. Top 555 players will receive rewards in the form of SILKY tokens on their wallets. You need to buy nft for 1 SOLANA, to receive game access. The SILK tokens that will be collected, you can sell on a exchange.

## Q: Do game will have its own token?

A: At the moment, we are planning to integrate our token into the game. All mechanics will be implemented via NFT and SLK tokens to interact with the game.

## DENIAL OF RESPONSIBILITY:

The SILKY INU Project, its participants, its social channels, its individuals, and this document are not responsible for providing trading advice or investment advice of any kind. In situations where decentralization is the primary driver of the token, as well as other centralized methods, it is advisable to consult with a professional or legal advisor before purchasing or interacting with an SLK token. By purchasing SLK, you agree that neither the developers nor the project will be held legally liable for any damages. The team will remain unharmed for any damages that may have occurred. The SLK token is also not a security and is not claimed as such. If you live in a region where you cannot legally own cryptocurrencies or are not allowed to trade in any type of market where SLK is listed, you must abide by these laws. All cryptocurrencies are risks, and you understand that these risks can be applied to you when you interact with this token or any others.
